Personal Profile

A detail-oriented Senior Machine Learning Data Associate with hands-on experience annotating and classifying multimodal datasets (text, image, video, and audio) to support AI/ML model training. Consistently exceeds performance targets, maintaining 99% annotation accuracy against a 96% quality benchmark while processing tasks well ahead of average handling time (AHT) standards. Skilled in Amazon's proprietary internal annotation tooling, data cleaning, and Power BI-based reporting, with a strong foundation in business information technology. Committed to precision, consistency, and continuous improvement in fast-paced, quality-driven environments.

Technical Skills

- Data Annotation & Tools: Proprietary Amazon annotation software, data classification & labeling, quality assurance (QA)
- Data Analysis & Visualisation: Excel, Power BI, SQL (MySQL, PostgreSQL, Oracle), data cleaning
- Additional: Python (intermediate), Microsoft Office Suite

Key Competencies

- Data Annotation & Quality: Annotate and classify multimodal datasets (text, image, video, and audio) using proprietary Amazon annotation software; maintain 99% accuracy against a 96% quality target while exceeding AHT performance benchmarks.
- Data Analysis & Reporting: Clean, analyse, and visualise data using Excel and Power BI; identify trends and support data-driven decision-making.
- Guideline Interpretation: Apply detailed project guidelines consistently across ambiguous or edge-case data, escalating and resolving discrepancies with quality leads.
- Administration & Operations: Maintain accurate records, support efficient resource use, and coordinate day-to-day administrative tasks in fast-paced environments.

Work Experience

Amazon, Greater London

Senior Machine Learning Data Associate | Sept 2025 to Present

- Annotated and classified multimodal datasets (text, image, video, and audio) using proprietary internal Amazon annotation software, ensuring data integrity and consistency across large-scale ML training pipelines.
- Maintained 99% annotation accuracy against a 96% quality target, consistently ranking among the fastest performers on the team against average handling time (AHT) benchmarks.
- Interpreted detailed project guidelines to apply consistent classification standards across ambiguous or edge-case data, supporting on-time delivery of project objectives.
- Collaborated with team members and quality leads to align labeling standards and resolve annotation discrepancies.

ChloLay Ltd, Sunbury-on-Thames

Remote Data Entry Team Member | Jan 2022 to Aug 2023

- Entered and processed high volumes of data accurately against strict deadlines.
- Developed strong proficiency in Excel for data organisation and reporting.
- Reported data quality and progress updates to team leader, building early experience in structured data handling.

Marks & Spencer, Uxbridge

Seasonal Employee | Dec 2021

- Worked in a fast-paced environment during the Christmas period.
- Ensured shop floor uniformity and customer satisfaction.
- Developed skills in teamwork, time management, and task execution.

Education

Southampton Solent, Hampshire

BSc (Hons) Business Information Technology | Sep 2018 to Sep 2021

- Achieved a Certificate of Higher Education (CertHE, 80 CATs).
- Coursework covered business systems, operations, and data-driven strategy.

Masterschool, Online Remote

Data Analytics & Data Visualisation | Sep 2023 to Sep 2024

- Completed a self-directed course covering data cleaning, analysis, and visualisation using Excel and Power BI.
- Final project: cleaned and analysed a mock dataset, presenting findings through interactive dashboards.

Stockley Academy, Middlesex | Sep 2014 to Sep 2016

- 9 GCSEs at a grade of C or above, including English and Maths.
- 2 A level qualifications in Applied Business and IT.
- Level 3 Cambridge Technical Diploma in IT – Distinction*
- GCE Applied Business – C

Hobbies and Interests

I have a genuine interest in data analytics and machine learning, and regularly work on personal projects involving data cleaning, analysis, and visualisation in Excel and Power BI. I follow developments in AI and data annotation through online courses and industry content. Outside of data work, I stay active through running and yoga, and take part in community volunteering focused on education and technology access.
